Nanda Krishna C

Computer Science Undergraduate

nandakrishnac2008@gmail.com
Vellore, Tamil Nadu, India
github.com/urfairygodmother

Professional Summary
Motivated and detail-oriented Computer Science student with a strong academic foundation and hands-on experience in hardware architecture, sensor technologies, and Python programming. Passionate about exploring the intersection of software development, gaming technology scripting, and data-driven equity modeling. Demonstrates a consistent track record of academic excellence from early education through high school.

Celebrating academic excellence and competition achievements.

EDUCATION

Vellore, Tamil Nadu

Vellore Institute of Technology (VIT)
Bachelor of Technology in Computer Science (Core) | 2026 – Present **Registration**

- **Number:** 26BCE0325
- **Relevant Coursework:** Python Programming, Data Structures & Algorithms, Computer Architecture.

Higher Secondary Education (Class XII)

Science Stream

- Comprehensive study in Physics, Chemistry, Mathematics, and Computer Science.

HONORS & ACHIEVEMENTS

12th Grade Science Stream Topper

Awarded for achieving the highest academic standing in the senior secondary board examinations across all core science disciplines.

1st Place — Mathematics Talent Search Examination (MTSE)

Secured the top rank in the state-wide 5th-grade competitive examination organized by the Kerala Ganitha Sasthra Parishad, demonstrating early aptitude for analytical problem-solving.

TECHNICAL & DOMAIN SKILLS

Programming & Software	Python (Algorithms, Logic Optimization, Code Debugging), ObjectOriented Concepts, Scripting.
Hardware & Systems	Sensor Technologies, Microcontroller Units (MCUs), System Hardware Architecture, PC Hardware Optimization.
Domain Expertise	Gaming Technology Scripting, Mod Mechanics, Data-Driven Equity Modeling, Financial Markets Analysis.

ACADEMIC PROJECTS & PRESENTATIONS

Smart Glove Hardware Architecture Study **VIT | Sep 2026**

Role: Team Member & Section Lead

- Collaborated within an engineering team to research and design the system framework for an interactive smart glove project.
- Spearheaded the research and delivered the final presentation on core hardware architecture.
- Effectively detailed the integration of Microcontroller Unit (MCU) boards and specialized sensor technologies to ensure accurate physical input tracking.

Algorithm Implementation & Code Debugging **VIT | Oct 2026**

Coursework & Assessment Module

- Implemented and analyzed fundamental sorting algorithms (including Bubble Sort and Selection Sort) using Python.
- Focused on logic optimization, time complexity review, and rigorous syntax debugging to ensure executable accuracy.

EXTRACURRICULAR INTERESTS

- **Financial Markets & Equity Modeling:** Actively engaged in analyzing stock markets and mutual funds; researching quantitative, data-driven approaches to predicting market trends and equity modeling.
- **Gaming Technology:** Deeply interested in the technical side of gaming, including configuring game client files, creating custom scripts and modding mechanics, and optimizing high-end laptop hardware setups for peak performance.
- **Quantitative Problem Solving:** Cultivated a long-standing passion for complex mathematics, logic puzzles, and analytical problem-solving since primary education.
